# How to fix the system

- make healthcare in America a human right
- pay for the care of populations, not events
- put the patient in the driver's seat
- computerise medical records once and for all
- use modern engineering science to make healthcare safer and smoother
- re-energise nursing and primary care
- give up the 'more is better' myth

# National Audit Office report on Connecting for Health

- successes
  - QMAS
  - PACS
  - NHS Directory
  - N3
- several systems behind schedule
  - Choose and Book
  - National Data Spine
  - National Care Records Service
- willingness of Trusts to implement
- clinical engagement
- cost

# Future topics

- wireless healthcare
  - mobile devices
  - RFID
    - Radio Frequency Identification Devices
- meaningful measurement
  - outcome
  - process
  - balancing
- SnoMed CT
- lean healthcare
  - Toyota
- suggestions please!
